

**Planet:** a metaphor to describe the cognitive/mental “journey” one takes to experience the design process.

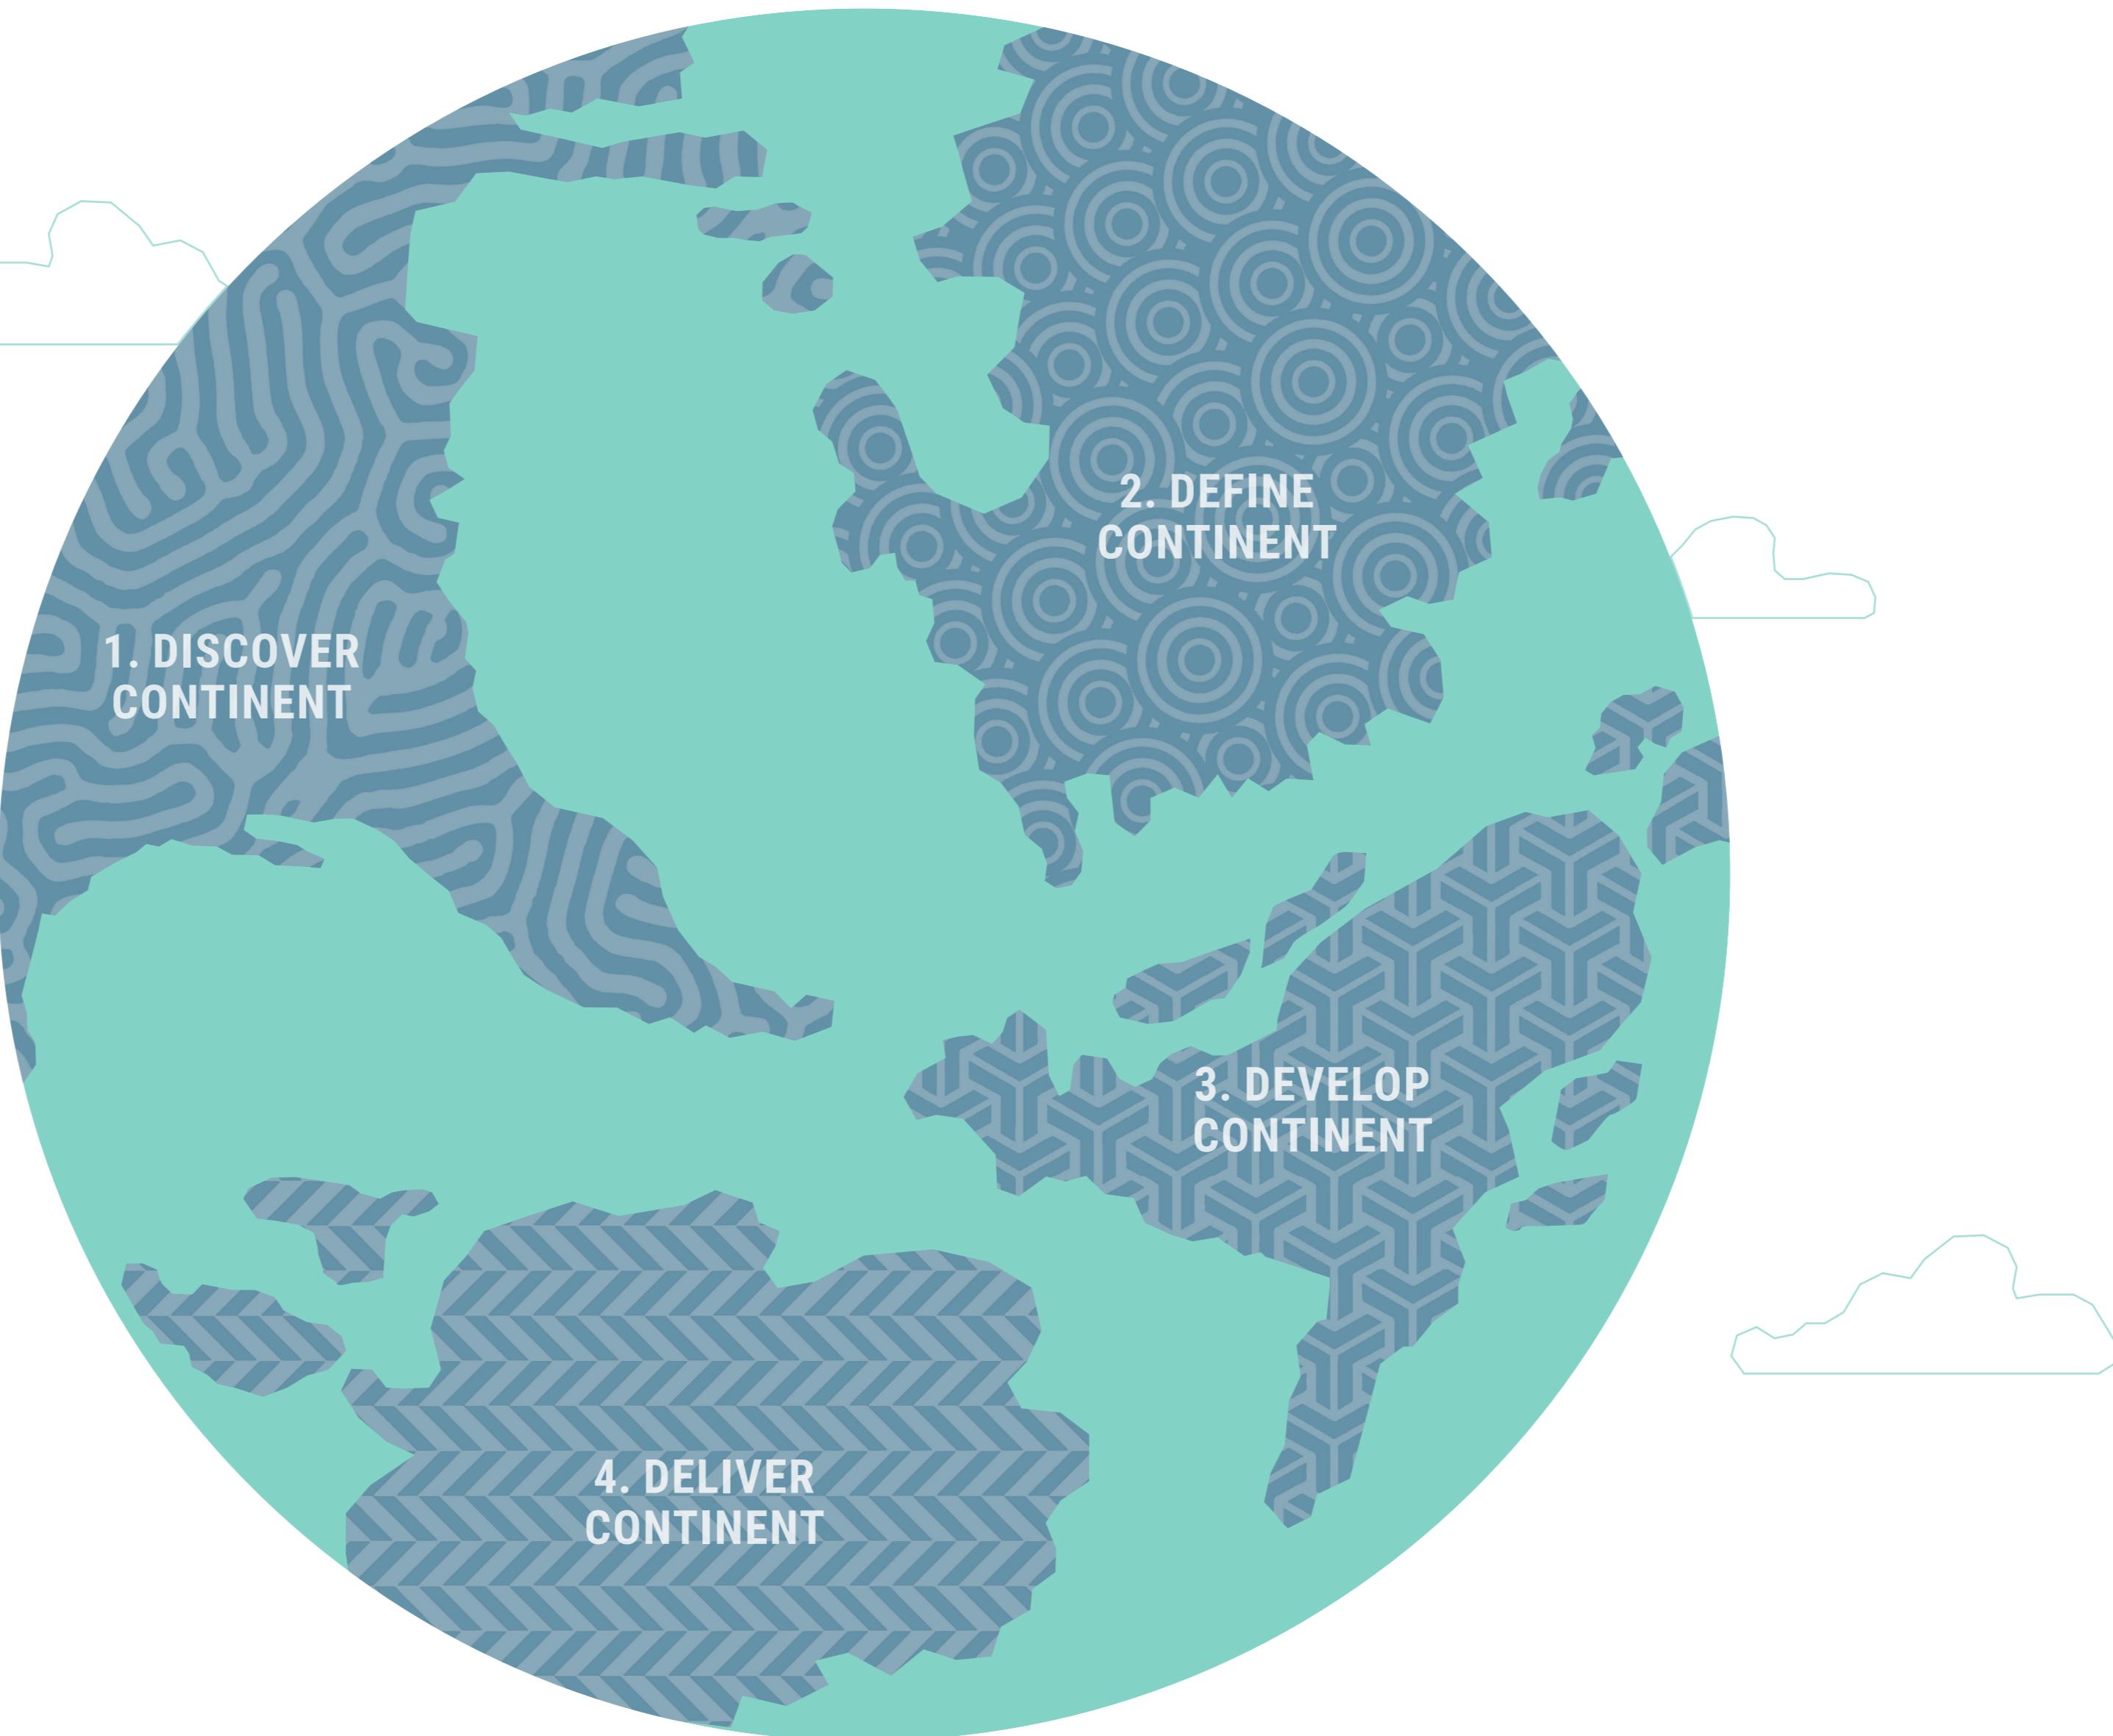

**Continents:** the “phases” of the design process as defined in the Design Thinking methodology. The British Design Council has identified 4 key phases and calls this model, the “Double Diamond”, consisting of: the Discover, the Define, the Develop, and the Deliver phase.

**Countries:** the “concepts” that are important to know/learn when developing a project and being part of a team.

**Cities:** the “tools” that you can use to understand concepts, e.g., empathy, sustainability, entrepreneurship. You may find links to external sources, but, most importantly, our ChoiCo Games that we hope to make your journey more fun!

**Regions:** broad areas that include several cities (tools) that have a common topic or subject for you to explore.
